Rittal - The System Modifications

Customized enclosures done fast and on-time!

Rittal understands that each enclosure application is unique and varied. To help you save valuable resources, Rittal established a dedicated modifications centre which can modify and customize standard Rittal enclosures to meet your specific requirements. With an on site, state-of-the-art C.N.C machine Rittal can now add custom cut-outs to accommodate push buttons, touch screens, displays and climate control solutions.

Click here to watch the Rittal Modifications video or go to www.rittal.ca for our video and more information about our modification services
