The Game Changer for Time Saving Installs

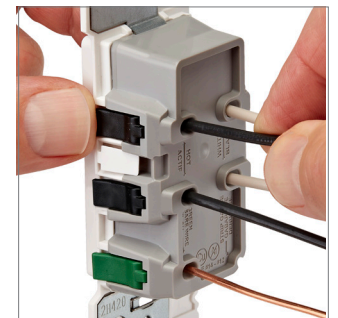

On the jobsite, time is money. Did you know there is now a faster, easier and safer installation method for switches and receptacles? It's the innovative Decora Edge solution – **PUSH. CLICK. DONE!**

Decora Edge delivers the trusted performance and contemporary appearance of traditional Decora® devices in a new, easier-to-install and safer design. Check out the many advantages Decora Edge offers to make installation faster, **saving you time and money on every job:**

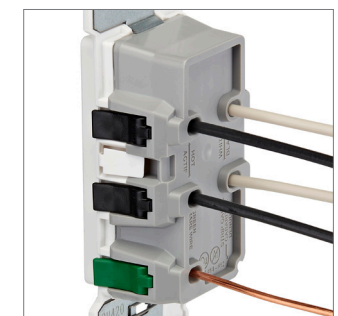

- Color-coded levers are easy to see in low light areas and help prevent miswiring
- The devices feature the ONLY screwless ground in the industry
- Designed for use with both 14 gauge and 12 gauge stranded and solid copper wire
- One standard strip gauge for all devices
- No screws = no torque requirement concerns
- Self-grounding
- No exposed metal parts helps to prevent shorts/mishaps during hot testing; no electrical tape needed
- Wire openings prevent wire insulation from being inserted into the terminals
- Large strap for easier install on drywall imperfections
- Tongue and groove for easier alignments in multi-gang installations
- Color-coded terminals facilitate faster training for new installers vs standard installation methods
